

Press Release: Kontours

Kontours is a website which provides free online travel information and pictures for various destinations around the world. The website was created by father and son team, Mike and Olly, and first went live in 2004 / 2005. Today the website receives thousands of visitors a year and its success is largely attributed to its clear presentation and style and impartial approach.

Mike first thought of the Kontours idea when searching for information when planning a trip abroad. He struggled to find a site which offered a selection of images, which weren't just artistic shots, and actually showed what a place was actually like. He'd always been keen on travel, and got his son, Olly, involved who knew a thing or two about website design.

Working together Mike and Olly soon released the first version of Kontours with a small number of pages and images. Since that initial launch the Kontours website has expanded into what it is today, with over 50 pages of original content, which is all free to access.

This latest version of the Kontours website was launched in October 2009, and is set to be the brightest, most well-written, and informative version yet! The site is continually maintained, improved and added to, and will continue to be so as long as visitors remain strong!

Olly, when asked for his opinion on Kontours said, "The site is really something different, and there's not a lot like it out there on the web. You can find loads of websites offering pictures of exotic destinations around the world, but most of them are artistic and of little use to your average traveller. We hope that's where Kontours comes into its own and offers the reader something completely new."

For more information on Kontours see the notes below.

**** ENDS ****

Kontours is accessible by visiting <http://www.kontours.info>

For more information please email kontours@gmail.com marked for the attention of Mike or Olly.

Thank you for your interest and support for Kontours, and we wish you happy travelling!
